

HYDRAULIC DOCK LEVELER

The Lenworth Hydraulic Dock Leveler features a high level of quality, ease of operation, and advanced safety features that make it an ideal choice for increased safety and productivity in your loading bay. With a single push button control for sequenced deck and lip operation, the hydraulic leveler provides quick and easy operation. When it comes to structural integrity and durability, it's hard to beat. A minimum of six heavy-duty U-beam channels are welded to the underside of the deck at dynamic impact points, preventing "dishing" and extending the life of the dock leveler. The continuous one-piece headboard intensifies the strength of the deck's front structure. A single lip hinge pin enables a stronger distributed load. The Lenworth Hydraulic Dock Leveler, packed with safety and operational features, is a great choice for facilities that need to increase their productivity and operational efficiency.

The Platinum Series is our premium line of products. The product line features exclusive product features and enhanced performance.

Ask about upgrading!

- Available up to 80,000 lbs capacity
- Standard 3-wheel center deck support which accommodates 3-wheel forklifts
- Full operating range metal toe guards painted safety yellow as specified by ansi z535
- Dock lip gussets provide optimum rigidity on high stress areas of the dock
- Maintenance strut that supports the deck and lip and facilitates under-deck maintenance and inspection
- Unique deck flex advantage allows the deck to flex up to 4" (101mm) when under load to ensure full-width contact between the lip and the truck bed
- Intelligent touch controls use a velocity fuse built into the cylinder of the dock leveler to limit free fall of a loaded platform in the event of a hydraulic line rupture or unscheduled truck departure
- Locally made in Canada and easily accessible after market parts for a fraction of the cost of other manufacturers
- 12-year structural warranty
