# **HIGH-SPEED DOOR GUIDE**

## **DYNACO SLIMLINE TECHNO HIGH-SPEED DOOR (INTERIOR)**

The Slimline Techno door is designed for interior environments, providing a high-tech, safe, and aesthetically pleasing door for even the most demanding customers. The Slimline Techno combines our proven control and drive system, with our specially modified bead sealing technology, for ultra-smooth, ultra-quiet operation.

Incorporating DYNACO's exclusive DYNALOGIX II controls, with a variable frequency drive, provides maximum performance, flexibility and self-diagnostic capabilities for technology driven environments. The Slimline Techno will operate with a difference in pressure of up to 0.82 lbs/sq.ft (winds of 10mph indicative, not including any multiplication coefficients, and taking into account the configuration of the building).

### **PRODUCT FEATURES**

### SAFETY FIRST

With a DYNACO door, your safety is assured. Infrared photo-eyes and a wireless sensing edge reverse the door automatically if an obstruction is detected or contacted. Our soft bottom edge curtain is free of heavy, rigid components thus protecting users and equipment from common hard edge accidents. Our OPTIONAL EGRESS FEATURE provides additional safety for your employees in an emergency.

#### **PRODUCTION EFFICIENCY**

Your production flow is optimized by the DYNACO door's industry leading opening and closing speeds. True SELF-REINSERTION eliminates manual intervention thus reducing maintenance and increasing uptime. Your valuable products and equipment are protected!

#### **ENERGY SAVINGS**

Installing a DYNACO door saves energy! Its high speed operation and industry leading seal significantly reduce unwanted air transfer saving you money hour after hour.

#### **SUPERIOR SEAL**

The patented side guides and tight seal keep out unwanted contamination and eliminate wear prone weather-strip systems.

#### **TECHNICAL DATA**

Maximum Height: 12' H Maximum Width: 12' W Technology: Gravity

Opening Speed: Up to 48"/sec Closing Speed: Up to 24"/sec
